Malcolm Fender, Trainer (NLP Master Practitioner)

These two days build on your NLP Diploma course competencies. This module will give you structure, context and extra skills for putting what you have learnt so far into practise as a coach.

In addition to the new aspects such as Reframing and using Precision Questions, you'll also get a fresh slant on core NLP topics such as Rapport and Outcome Setting, and clarify for yourself what excellent coaching is and how to do it.

This is for you if you coach or want to coach as part of your work e.g. as a manager, leader, consultant, trainer or health professional. It is also highly relevant if you want to start, develop or accelerate your career in coaching. Additionally you'll be able to apply these skills in numerous other ways including for your personal growth and for enhancing the quality of your communication in areas such as personal relationships and business.
